1. The terminal disclaimer filed on 06/05/2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US patent 6,564,130 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Allowable Subject Matter***

2. Claims 1 – 21 are allowed over the prior art of the record.

3. The following is an examiner's statement of reasons for allowance: The prior art of the record fails to anticipate or fairly suggest, an apparatus for aiding steering when a vehicle is being driven in reverse, the moving direction of the vehicle being determined in response to the angle of steered wheels, the apparatus comprising: a camera for capturing an image of an area behind the Vehicle; a monitor for displaying the image captured by the camera; a detector for detecting the angle of the steered wheels; and a display control unit for displaying a guide marking for aiding steering while a driver operates a steering wheel, the marking and the image being simultaneously displayed on the monitor when the vehicle is being driven in reverse, wherein the marking provides the driver with at least first and second indications, wherein the first indication is a fixed reference guide displaying vehicle width projecting behind the vehicle and continuously showing a path of the vehicle corresponding to the angle of zero degrees of the steered wheels regardless of the current angle of the steered wheels, and wherein the second indication is simultaneously displayed with the first indication and

shows a prospective path of the vehicle corresponding to the current angle of the steered wheels detected by the detector, as specifies in the independent claims.

Claims 2 – 13, 15 – 18 and 20 – 21 are allowed with respect to dependency to allowable independent claims 1, 14 and 19.
